Fairfax, VA | (571) 682-9506 | sgaikwa4@gmu.edu | [LinkedIn](#)

SUMMARY

Structural Engineering graduate from George Mason University with 3+ years of experience in structural design, analysis, and construction coordination for steel and reinforced concrete infrastructure. Applied structural modeling and analysis using RAM Structural System, SAP2000, STAAD.Pro, and MIDAS Civil in accordance with AISC 360, ASCE 7-22, and AASHTO LRFD standards. Coordinated large-scale infrastructure projects exceeding \$100M through structural analysis, field execution, and technical documentation. FE Civil candidate pursuing entry-level Structural Engineer and Bridge Engineer opportunities.

TECHNICAL SKILLS

Engineering Expertise: Structural Design, Bridge Substructure Design, Seismic Analysis, Soil-Structure Interaction, Bridge Load Analysis, Prestressed Concrete Design, Steel Member Sizing, Buckling Analysis, Finite Element Analysis (FEA)

Software & Tools: RAM Structural System, SAP2000, STAAD.Pro, MIDAS Civil, Revit, AutoCAD, LARSA 4D, Primavera P6, QGIS

Codes & Standards: AISC 360, ASCE 7-22, AASHTO LRFD, IBC 2021, ACI 209R, Seismic Design Standards, Bridge Design Codes.

Certificates & Training: Engineer in Training (EIT) -- FE Exam Planned 2026, FHWA/NHI Introduction to Safety Inspection of In-Service Bridges, General Superstructure Design Considerations Training

PROFESSIONAL EXPERIENCE

Big City Project Pvt. Ltd., Mumbai, India Jun 2022 – Aug 2024

Jr. Site Engineer

- Managed execution of \$100M+ infrastructure project (850k sq ft), delivering 4 weeks ahead of schedule.
- Directed quality control for 15+ subcontractors, achieving a 15% reduction in defects against specifications.
- Facilitated field implementation of 5+ reinforced concrete and steel structural components per approved drawings.
- Liaised with 3 key stakeholder groups (architects, consultants, clients) to align construction with design intent and regulations.

Big City Project Pvt. Ltd., Mumbai, India Nov 2021 – May 2022

Intern

- Improved coordination accuracy by 15% through material testing and surveying of structural components.
- Resolved 20+ drawing and execution challenges by collaborating with contractors, consultants, and site engineers.
- Generated 50+ construction documents ensuring adherence to project specifications & coordination standards using AutoCad.

ACADEMIC PROJECTS – Structural Engineering

George Mason University | M.S. in Civil Engineering Apr 2024 – May 2025

Steel Structure Design – STAAD. Pro

- Developed governing load combinations per ASCE 7 (LRFD) and verified member capacity against demand-to-capacity ratios.
- Evaluated structural stability and buckling behavior, optimizing steel member sizing to achieve 10% average material cost savings.

Prestressed Beam Design with Time-Effects – LARSA 4D

- Modeled prestressed concrete beams including creep, shrinkage, and relaxation effects per ACI 209R.
- Conducted staged construction analysis to verify long-term serviceability per ASCE 7 and AASHTO LRFD.

4-Story Mixed-Use Building Design – RAM Structural System

- Designed gravity and lateral systems for a steel-framed building per IBC 2021, AISC 360, and ASCE 7-22.
- Analyzed wind and seismic lateral loads using ASCE 7 load combinations.

Bridge Substructure Design – MIDAS Civil

- Designed pile foundations and pier caps using MIDAS Civil per AASHTO LRFD for axial and lateral load demands.
- Conducted soil-structure interaction modeling in MIDAS Civil, optimizing pile layout and reducing material usage by 12%.

University of Mumbai | B.E. in Civil Engineering Aug 2022 – Aug 2023

Remedial Solution for Urban Waterlogging and Drainage – Q-GIS

- Mapped and analyzed drainage patterns across 50+ sq. km flood-prone urban areas using QGIS.
- Proposed sustainable stormwater solutions projected to reduce flood frequency by 30%.

EDUCATION

George Mason University, VA Aug 2024 – May 2026

M.S. Civil & Infrastructure Engineering

University of Mumbai, India Aug 2019 – May 2022

B.E. Civil Engineering

CERTIFICATIONS & TRAINING

- General Superstructure Design Considerations – National Highway Institute (NHI), 3 Hours Nov 2024
- Introduction to Safety Inspection of In-Service Bridges – (FHWA, NHI), 18 Hours Dec 2024
